NISHANT KUMAR SINGH

TECH LEAD — MOBILE & FRONTEND | REACT NATIVE SPECIALIST | SCALABLE ARCHITECTURE | ENTERPRISE APPLICATIONS

📞 +91-9958101777 | ✉️ nishant.bitindia@gmail.com | 🔗 LinkedIn | Portfolio | 📍 Noida, India

📝 PROFESSIONAL SUMMARY

Senior Tech Lead — Mobile & Frontend (React Native, React.js) with 15+ years of experience delivering scalable, secure, and user-centric high-performance applications. Experienced across both enterprise-scale systems and product-focused development.
Expert in mobile architecture and the React Native ecosystems, with proven success across Fortune 500 clients including Verizon, Wolters Kluwer, Sunrise, and Lebara, driving digital transformation and measurable business impact.
Led teams of up to 12 engineers, mentoring 50+ developers and establishing engineering best practices.

🛠️ SKILLS

Frontend: React Native, React, JavaScript, TypeScript | **State Management:** Redux, Redux Saga, RTK | **Architecture:** MVVM, Clean Architecture, Component-Driven Design | **APIs & Data:** REST, GraphQL | **Mobile:** iOS (Swift, Objective-C) | **Testing:** Jest, Unit Testing

🏢 EXPERIENCE

Tech Lead — Tech Mahindra Ltd | Noida | Dec 2016 — Apr 2026

- Achieved **99% security remediation (Verizon, US)** by resolving 10,000+ vulnerabilities across multiple applications, significantly strengthening security posture.
- Reduced support calls by **60% (Lebara, UK)** by building an accessibility-driven, modular component architecture, improving reusability, consistency, and user experience.
- Improved productivity by **20%** by developing a Workplace Companion App enabling unified access to enterprise resources for **1M+ users (Wolters Kluwer)**.
- Digitized **36 processes (Sunrise, Switzerland)** by building a secure ID onboarding app, reducing manual effort by **75%** and operational costs by **50%**.
- Designed and implemented a centralized SOQL-based communication engine (iField App) integrating Salesforce via REST APIs, reducing duplicate implementations by ~40% and improving processing efficiency by ~30%.
- Reduced crash rate by ~35% and increased crash-free sessions to **99.5%** by implementing crash reporting, analytics, and runtime monitoring.
- Established coding standards aligned with GDPR, OWASP, and SOLID principles, reducing production defects by ~30% and improving maintainability and engineering consistency.
- Led end-to-end SDLC for scalable enterprise applications, delivering high-performance, maintainable, and business-aligned solutions.
- Owned iOS release lifecycle, managing provisioning, TestFlight, and App Store submissions to ensure smooth, zero-blocker releases.

iOS Tech Lead — Wildnet Technologies Pvt. Ltd | Noida | Nov 2013 — Nov 2016

- Built a scalable field service mobile application for Commusoft with real-time job and diary management, and engineered a highly customized, performant calendar-based UI (daily/weekly/monthly), supporting 1,000+ field engineers with ~99% sync reliability.
- Led end-to-end iOS development across multiple projects using Objective-C and Swift, delivering scalable and high-performance apps.
- Improved app performance and stability through optimized architecture, efficient memory management, and robust error handling.

Software Engineer — Hytech Professionals Pvt. Ltd. | Noida | Apr 2010 — Nov 2013

- Built feature-rich BlueMe, achieving 2M+ downloads and #1 App Store ranking (Utility), delivering Bluetooth-based offline file sharing with chat, advanced file management, cloud sync (Dropbox/OneDrive), and multilingual support.
- Awarded **iApp Innovation Award;** progressed from trainee to core iOS developer while delivering high-performance, user-centric apps.
- Implemented RESTful API integrations and optimized application features, improving data handling and overall app performance.

💼 PROJECTS

Workplace Companion — *Wolters Kluwer, US*

- Delivered a unified enterprise mobile application supporting **1M+ users** with real-time company updates and seamless access to Workday, SharePoint, chatbot and internal systems.
- Improved employee productivity by **20%** and enhanced accessibility through a centralized, user-centric platform.
- Reduced release cycle by **25%** by integrating Azure AD (MSAL), Notification Hub, Azure DevOps CI/CD pipelines, and CodePush.

Tech: React Native, Redux, Accessibility (a11y), JWT, Azure Notification Hub, Biometric Authentication, ADO-Git, Intune Policy SDK (MAM)

Verizon — *US*

- Led large-scale security remediation across multiple application brands, achieving **99% vulnerability resolution (10,000+ issues)** and significantly strengthening enterprise security posture.
- Identified and mitigated critical vulnerabilities using SAST, DAST, SCA, and penetration testing, ensuring continuous compliance with secure coding and regulatory standards.
- Established secure engineering practices and governance aligned with **OWASP and enterprise security frameworks**, reducing risk

exposure and improving overall application resilience.

Tech: AEM, React, Fortify, Black Duck, OWASP ZAP, SAST/DAST/SCA, Pen Testing

My Sunrise & MyLebara — *Switzerland & UK*

- Delivered telecom self-care mobile applications enabling seamless account management, reducing customer support calls by **60%** through improved user experience and self-service capabilities.
- Enhanced application reliability and consistency by implementing component-driven architecture, Storybook, and centralized logging, monitoring, and analytics systems.
- Integrated secure payments (Adyen) and real-time push notifications to drive user engagement and transaction efficiency.

Tech: React, React Native, Redux Saga, MVVM, Storybook, Accessibility, Adyen Payments, Push Notifications, Certificate Pinning

Sunrise ID Checker — *Switzerland*

- Delivered a secure digital onboarding solution, digitizing **36 business processes** and reducing manual effort by **75%**, significantly improving operational efficiency.
- Engineered an OCR-based identity verification system with third-party integrations (PXL Vision), enabling accurate and seamless customer onboarding.
- Strengthened security and compliance through secure data handling, SSL pinning, and robust monitoring, ensuring reliable and fraud-resistant identity verification.

Tech: iOS, Objective-C, OCR, Digital Identity, PXL Vision, Logging & Monitoring, Mobile Security, SSL Pinning, APNS

iField App & Buniyad Realtors

- Designed and implemented scalable Salesforce integrations using SOQL over RESTful APIs, enabling seamless mobile–CRM data exchange.
- Built a reusable communication and sync layer, reducing integration effort by **~40%** and improving data access efficiency.
- Implemented offline-first data synchronization with queueing and retry mechanisms, achieving ~99% data sync reliability in real-time field operations.

Tech: iOS, Swift, REST APIs, Salesforce (SOQL), Offline-first, Track Field Agent, Google APIs, Google Map

🧠 TECHNICAL EXPERTISE

🔐 Security, Compliance & Risk Management

- Mobile Security: Root/Jailbreak, Frida/Magisk Detection, RASP
- Network & Code Security: SSL Pinning (Prevent MITM), Code Obfuscation, Secure Storage, JWT, Code Signing
- Security Standards: OWASP MASVS, GDPR Compliance
- Vulnerability Management: SAST (Fortify, Snyk, Semgrep), DAST (OWASP ZAP), SCA (BlackDuck), Penetration Testing

📊 Logging, Monitoring & Accessibility

Firebase Crashlytics, Bugsnag, Instabug | Adobe Analytics, Google Analytics, Centralized logging & analytics | Accessibility (a11y) WCAG/ADA Compliance, VoiceOver, TalkBack, Accessible UI Components

🏗️ Architecture & Engineering Practices

MVC, MVVM, Clean Architecture | CDD, Modular Design

☁️ Cloud & DevOps

Azure, AWS, Google Firebase, Salesforce | Azure DevOps Pipelines, CI/CD

🔗 APIs, Authentication & Payments

REST, GraphQL, SOAP, OAuth 2.0, MFA, Biometrics, Adyen, Stripe, PayPal, Authorize.net

🛠️ Platforms, Tools & Apple Ecosystem

iOS, Android, Web | Xcode, Android Studio, VS Code | App Store, Provisioning, TestFlight, APNS

🏆 AWARDS & ACHIEVEMENTS

- **15+ Awards & Achievements** including — 5× POB | 2× Bravo | Star Award | Standing Ovation | Digital Warrior | Meritorious Mentor | iApp Innovation | Multiple Client & Team Excellence Awards
- **Consistent top performance** with **5× Excellent Ratings** at Tech Mahindra
- **Mentored 50+ developers;** led teams of up to 12 engineers, improving delivery quality and engineering standards.

🎓 EDUCATION — B.Tech, *Information Technology* – (*UPTU), 2004—2008*
